

Designs for 3D Printing: DNNSummit Awards

Presented at the annual DNNSummit conferences, these awards celebrate the extremes of the software platform and have been an opportunity for marketing Moore Creative design and development services to attendees!

Utilizing the initial DNNSummit 2016 logo as a core element, I designed four different awards to celebrate the Most Users, Most Portals, Oldest (Classic) and Travel Award. Designs feature icons which match each award's theme and graphic elements display stars, dots and event dates to help create the look of a prestigious award. Care was taken to allow for open space to accommodate the scale of detail possible with the chosen 3D printing methods.
